

HAZMAT DOCUMENTATION AND QUALITY ASSURANCE

SHIPOWNERS

- "We know that our success depends on top performance within Health, Safety, Environment and Quality."

Rachael Jackson, Public Relations Manager at Fred. Olsen.

At Metizoft we're ready to help you out when it comes to compilation and updating of HazMat documentation such as IHM (Inventory of Hazardous Materials) and AFD (Asbestos Free Declaration). A new EU regulation for instance requires all

vessels with an EU flag or entering EU ports to have a continuously updated IHM on board at all times. Additionally, shipowners are required to have updated AFD on board their ships, to comply with various asbestos regulations.

Why Should You Work With Metizoft?

Certified

Get the benefit of relying on the expertise of our certified HazMat Experts.

Unique

Our proprietary turnkey solution consists of HazMat expertise and state-of-the-art technology to form a unique service.
